DOC-011 | Customer Internal Memo

Created: February 17, 2026, 12:20 MST

Author: Nora Bell, Horizon Purchasing Coordinator

Recipients: Maya Chen; Victor Hale (operations)

Subject: Potential downstream impact of HM-1048 delay

Assembly line managers have warned that the delayed SC-40 parts may interrupt production of our new industrial pump line. The preliminary schedule assumes we need 1,000 modules by February 23. Victor has mentioned a possible lost customer order but has not provided a signed customer contract or margin analysis.

Procurement should obtain the alternate supplier quote today and verify whether stock is actually available for delivery by February 23.

Internal operational memo only. It does not prove any completed lost sale or amount of loss.
