Subject: Response to February 21 notice

Summit disputes that it alone caused the delivery problem. Your February 6 serial-label request required production changes and forced us to rework packaging. Our team understood that the date would move if the labeling was adopted.

We shipped 600 units on February 14 and expect to deliver the remaining 1,400 no later than March 3. We also dispute any alleged lost-profits claim under Section 6 of the agreement.
